

# MULTI-PURPOSE WORK AND HANDLING TABLE

Handle, position, and work on your panels alone,  
efficiently and safely.

[contact@agbois-concept.com](mailto:contact@agbois-concept.com)

# A solution born from the demands of Photovoltaic and Woodworking industries

Designed for **handling large format panels** fragile, heavy, and bulky — this table meets high standards in ergonomics, safety, and productivity.

**Suitable for all trades handling panels** : wood, metal, glass, composites...

## Field observation

Handling panels remains :

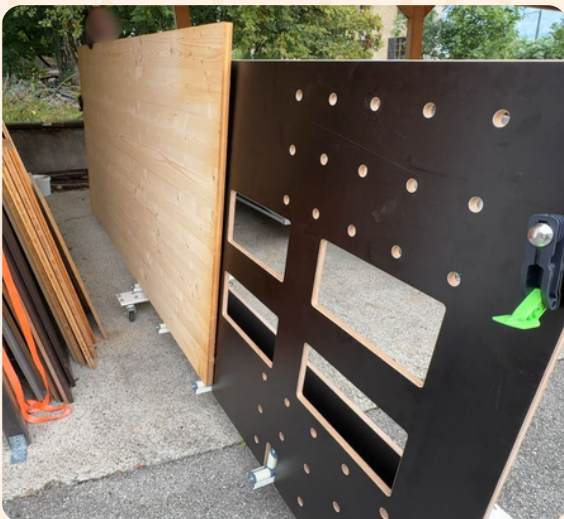

- Time-consuming
- Physically demanding
- A source of risks (MSDs, falls, breakage)

→ Impacting productivity & quality

## A practical solution

With a single operator :

- Easier loading
  - Precise positioning
  - Controlled tilting and rotation
  - Optimal working position
- Less effort, more efficiency, greater safety

# Designed for your work environments

## Industrial & workshop use

- Machine feeding
- Reduced handling
- One-person operation
- Ergonomics and repeatability

## Material trade & DIY stores

- Cutting assistance
- Panel flow management
- Simplified loading/unloading
- Reduced physical strain

## One piece of equipment, multiple functions

- Panel handling
- Machine loading/unloading
- Horizontal or inclined workstation
- Assembly or inspection support

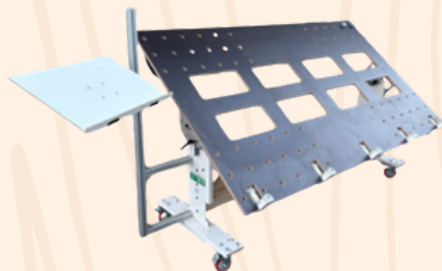

## Key features

- Operated by a single person
- Immediate time savings
- Reduced risks
- Maximum versatility
- Suitable for confined spaces

## Main specifications

- Panels up to 2,500 x 1,500 mm
- Maximum recommended load: 120 kg (as centered as possible).
- Tabletop : 1,200 x 2,100 mm with 20 mm holes for use with commercially available table clamps
- 180° rotation with locking system
- Retractable roller rail
- 4 industrial wheels with brakes
- Vertical storage for minimal footprint.

**Customizations for specific uses or workstations  
available upon request.**
